

# MDG+ BROBOTS<sup>®</sup> YOUR OPTIMAL FRAMEWORK

SAP Master Data Excellence – the Turbo for  
Business Development between Regulatory Affairs and AI

## AUTOMATION

The best part first: **there is no need to reinvent MDG in your company!**

### Our toolbox for you: automation for business performance and security

Welcome to the premier class of Master Data Governance. Having excellent master data is crucial for the digital transformation of your company. By generating high quality data, we lay the foundation for the intelligent digitalization and automation of your business model. This allows us to increase the operational efficiency and quality of strategic decision-making..

### The certified solution for SAP S/HANA

Governance regulations for business partners and materials are becoming increasingly important. Our MDG solutions seamlessly integrate these requirements into the processes, so that regulatory barriers can be turned into opportunities for more productive and secure workflows. With our expertise in master data management, we create the basis for increased competitiveness and save you both time and money. Whether on-premise or in the cloud – we implement MDG on S/4HANA as an important lever for a data-driven company!

### ✓ AT A GLANCE

#### Direct cost savings:

- 1,000 master data duplicates cost 400,000 euros in the life cycle.
- Costs of recreation reduced by 75%.
- Error rate reduced by 95%.
- Thanks to data-centric SAP automation for business performance and security.

#### Sustainable, successful business development? Only with MDG

- Data services as a driver for competitive advantage.
- Performance: Having perfect master data is the key for digitalizing the business model, for the data-driven company and for AI.
- Compliance: Regulations or threats force companies into perfect data governance.
